Installation Technology and Light Stands

Always a good connection

fast, robust, safe.

Preamble

Schreier Maschinen- und Apparatebau GmbH was founded in 1924 by Johann Schreier and is now in its third generation as a family business. In addition to the bulk materials technology sector, in which **schreier** manufactures requirement-specific machines for handling bulk materials (e.g. BIGBAG, container filling and emptying stations, lump breakers, screw conveyors and much more), **schreier** also produces a wide range of installation materials for equipping/supplying complete production-oriented businesses with electrical and air lines. Supports, pipe clamps and fastening elements as well as light stands in different variations for lighting in industrial plants round off the portfolio. **schreier** products are successfully used in many branches of the industry.

What sets us apart?

We have always offered customer-oriented specialisation and both durable and high quality, which has paved the way for us in this worldwide, cross-sector market. The planning, design and manufacturing of our products are carried out exclusively in Ludwigshafen am Rhein by qualified employees. Innovation and solidarity are particularly important to us.

We would be pleased to support you with your projects and installations. Feel free to contact us!

C-grid cable tray

Always a good connection - The ideal installation technology for cables of all types

The C-grid cable tray is a cable and line support system made of 4.5 mm thick steel wires that are welded together. The profile is reminiscent of the capital letter C, which explains the name C-grid cable tray.

schreier C-grid cable trays are characterised by high stability, high flexibility as well as easy and quick installation options - especially for conversions and retrofitting. The C-grid cable trays can be used simultaneously as a cable routing and support system for electrical and control cables, air ducts, lighting or switching, measuring and control devices.

The robust C-grid cable trays can be connected to each other horizontally, vertically and at angles to any length. Mounting and fastening leave nothing to be desired, as the C-grid cable trays can be mounted on walls, ceilings, floors, but also on steel girders or steel structures, or suspended from ceilings.

The open design is advantageous because the C-grid cable tray can be easily fitted with cables at any level. Due to the fact, that the cable material is only inserted, changes and extensions can also be carried out very easily and fast. Moreover, in contrast to protective conduit installation, there is no need to break out pipes by sawing or burning.

schreier C-grid cable trays are available in various widths; the side height of 50 mm is identical for all versions, so that the coordinated mounting and fastening elements can be used universally. The C-grid cable tray as a cost-effective complete laying system for cables of all types is an optimal alternative to the usual protective conduit laying and to conventional cable support systems.

The C-grid cable trays and most of the mounting and connecting parts are available both in hot-dip galvanised finish according to DIN EN ISO 1461 and in stainless steel material 1.4301/304. Electrostatic powder coating is available as an alternative surface finish on order and when purchasing appropriate quantities.

C-grid cable tray

C-grid cable tray

inner dimension 50x50 mm,
length 3 000 mm,
mesh spacing 75 mm in
longitudinal direction,
made of steel wire Ø 4.5 mm

2155255 **16.70 €/m**

hot-dip galvanized according to
DIN EN ISO 1461

2155355 **27.95 €/m**

stainless steel material 1.4301/304

C-grid cable tray

inner dimension 100x50 mm,
length 3 000 mm,
mesh spacing 75 mm in
longitudinal direction,
made of steel wire Ø 4.5 mm

2155260 **17.80 €/m**

hot-dip galvanized according to
DIN EN ISO 1461

2155360 **34.25 €/m**

stainless steel material 1.4301/304

C-grid cable tray

inner dimension 200x50 mm,
length 3 000 mm,
mesh spacing 75 mm in
longitudinal direction,
made of steel wire Ø 4.5 mm

2155262 **22.50 €/m**

hot-dip galvanized according to
DIN EN ISO 1461

2155362 **44.65 €/m**

stainless steel material 1.4301/304

C-grid cable tray

inner dimension 400x50 mm,
length 3 000 mm,
mesh spacing 75 mm in
longitudinal direction,
made of steel wire Ø 4.5 mm

2155264 **34.50 €/m**

hot-dip galvanized according to
DIN EN ISO 1461

Mesh gutter cutter DN5

for cutting C-grid cable trays with
max. 5 mm diameter at a hardness
of max. 20 HRC, almost completely
burr-free shearing. The blades
are exchangeable. Creation of a
protective layer (galvanic element)
while cutting the hot-dip galvanised
grid cable tray.

100136 **215.00 €/pc.**

Replacement blades
11001002 **126.00 €/set**
stainless steel material 1.4301/304

Guide grid

for wires and cables
inner dimension 61x33 mm,
length 2 494 mm,
made of steel wire,
Ø 4 mm and Ø 3.15 mm

2512035 **on request**

powder-coated, brown RAL 8019

C-grid cable tray

C-grid cable tray

Cantilever

Cantilever 110

as a support structure for
C-grid cable trays
of sizes 50 and 100 mm,
for mounting on walls and
steel structures

2152580

7.60 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Cantilever 210

as a support structure for
C-grid cable trays
of sizes 200 mm or
100 and 50 mm in combination,
for mounting on walls and
steel structures

2152582

10.20 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Cantilever 310

as a support structure for
C-grid cable trays
in combination,
e.g. sizes 100 and 200 mm,
or 50 and 200 mm,
for mounting on walls and
steel structures

2152584

14.70 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Cantilever 410

as a support structure for
C-grid cable trays
of sizes 400 mm or 2x 200 mm, or
200 and 100 mm in combination,
for mounting on walls and
steel structures

2152586

20.40 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Cantilever 510

as a support structure for
C-grid cable trays
in combination,
e.g. sizes 100 and 200 mm,
or 50 and 200 mm,
for mounting on walls and
steel structures

2152585

23.25 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Cantilever 115

as a support structure for
C-grid cable trays
of size 50 and 100 mm,
for mounting on
H- and T-shaped stanchions,
continuous height adjustment

2152563

10.70 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Cantilever 215

as a support structure for
C-grid cable trays
of size 100 and 200 mm, or
100 and 50 mm in combination,
for mounting on
H- and T- shaped stanchions,
continuous height adjustment

2152565

11.10 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Cantilever 415

as a support structure for
C-grid cable trays
of size 400 mm,
for mounting on
H- and T- shaped stanchions,
continuous height adjustme

2152569

21.70 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

H- and T- shaped stanchions

H- shaped stanchion

mounting material for cable beds
I-profile 80,
length 6 000 mm,
with slotted holes 24x75 mm,
can be used as wall, middle and
hanging support

2152488 **224.50 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

T- shaped stanchion

mounting material for cable beds,
T-profile 45,
6 000 mm long,
with slotted holes 14x30 mm,
can be used as wall and hanging
support

2152508 **160.00 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Joint piece for H- shaped stanchion

BT sheet metal,
dimension 150x60x8 mm

2199930 **8.30 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Joint piece for T- shaped stanchion

made of flat steel,
dimension 130x30x6 mm

2199931 **2.45 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

H- and T- shaped stanchions

Bevel for H- shaped stanchion
made of flat steel 60x8 mm,
leg length 100x100 mm,
inclination 45°

2199935

8.70 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Bevel for T- shaped stanchion
made of flat steel 30x6 mm,
leg length 100x100 mm,
inclination 45°

2199936

3.15 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Mounting and attachment

Mounting bracket 90°, small
to connect 90° bends,
side length 170 mm with
9 slotted holes 7x20 mm,
completely assembled with
clamping pieces, springs,
washers and locking nuts

2155265 **6.90 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

2155365 **12.30 €/pc.**

stainless steel material 1.4301/304

Mounting bracket 90°, large
to connect 90° bends,
side length 230 mm with
13 slotted holes 7x20 mm,
completely assembled with
clamping pieces, springs,
washers and locking nuts

2155270 **7.90 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

2155370 **16.40 €/pc.**

stainless steel material 1.4301/304

Mounting bracket 45°
to connect 45° bends,
side length 103x103 mm with
6 slotted holes 7x20 mm,
completely assembled with
clamping pieces, springs,
washers and locking nuts

2155273 **8.10 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

2155373 **10.35 €/pc.**

stainless steel material 1.4301/304

Bendable connector
for individual connection of
C-grid cable trays,
length 264 mm with
9 slotted holes 7x20 mm,
completely assembled with
clamping pieces, springs,
washers and locking nuts

2155279 **8.90 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

2155379 **11.70 €/pc.**

stainless steel material 1.4301/304

Side connector
for a straight connection of
C-grid cable trays,
dimension 60x41 mm,
completely assembled with
truss-head screw,
washer and nut

2155280 **1.35 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

2155380 **2.30 €/pc.**

stainless steel material 1.4301/304

Corner connector
for angular connection of
C-grid cable trays for branches
and horizontal bends,
dimension 25x22 mm,
completely mounted with
hexagon screw

2155381 **2.10 €/pc.**

stainless steel material 1.4301/304

Mounting and attachment

Wall fastener

to attach C-grid cable trays
on walls, dimension 50x50 mm,
thickness 2 mm,
with slotted holes 11x16 mm

Fixing bracket for ceiling/floor
for mounting C-grid cable trays
on ceilings and floors,
dimension 53x53 mm,
width 40 mm, thickness 3 mm,
with slotted holes 8x23 mm

Clamping piece

to attach C-grid cable trays,
dimension 23x35 mm,
bolt length 20 mm,
completely mounted
with locking nut

2155282 1.30 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

2155382 2.65 €/pc.

stainless steel material 1.4301/304

2155283 1.60 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

2155383 2.45 €/pc.

stainless steel material 1.4301/304

2155284 0.95 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

2155384 1.35 €/pc.

stainless steel material 1.4301/304

Clamping plate

fixing material for
C-grid cable trays,
dimension 41x30 mm,
thickness 2 mm,
centred hole 9x9 mm

Side connector

in reinforced version for
continuous row installation with
50x50 mm C-grid cable trays,
consisting of 2 U-profiles
56x47 mm, length 69 mm,
thickness 3 mm, 3 flat plates
162x25 mm, thickness 4 mm, to fix
with carriage bolt M8x20 DIN 603

Hook bolt M6

with nut and washer,
for mounting
C-grid cable trays

2155285 0.95 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

2155385 1.50 €/pc.

stainless steel material 1.4301/304

2155286 14.30 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

1020001 0.65 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Fixing clamps

Fixing clamp, shape F
opening width 21 mm,
dimension 132x58 mm,
with 2 slotted holes 26x9 mm,
for mounting C-grid cable trays
to flange beams,
completely assembled
with hexagon screw M8x25

2199920 8.50 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

100204 23.95 €/pc.

stainless steel material 1.4301/304

Fixing clamp, shape F
opening width 21 mm,
dimension 166x58 mm,
with 3 slotted holes 26x9 mm,
for mounting C-grid cable trays
to flange beams,
completely assembled
with hexagon screw M8x25

8125254 8.90 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

100243 21.45 €/pc.

stainless steel material 1.4301/304

Fixing clamp, shape F
opening width 11 mm,
dimension 166x58 mm,
with 3 slotted holes 26x9 mm,
for mounting C-grid cable trays
to flange beams,
completely assembled
with hexagon screw M8x25

8153214 8.40 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

100261 23.65 €/pc.

stainless steel material 1.4301/304

Fixing clamp, form h
opening width 21 mm,
dimension 153x33 mm,
with 2 slotted holes 26x9 mm,
for mounting C-grid cable trays
to flange beams,
completely assembled
with hexagon screw M8x25

2199919 8.90 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

100205 21.20 €/pc.

stainless steel material 1.4301/304

Fixing clamp, form h
opening width 21 mm,
dimension 187x33 mm,
with 3 slotted holes 26x9 mm,
for mounting C-grid cable trays
to flange beams,
completely assembled
with hexagon screw M8x25

2199918 9.45 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

100242 24.15 €/pc.

stainless steel material 1.4301/304

Fixing clamp, form h
opening width 40 mm,
dimension 221x52 mm,
with 4 slotted holes 26x9 mm,
for mounting C-grid cable trays
to flange beams,
completely assembled
with hexagon screw M8x40

2199921 on request

hot-dip galvanized according to
DIN EN ISO 1461

100304 on request

stainless steel material 1.4301/304

Note: Special sizes can be made on request.

Fixing clamps

Flat steel claws

Flat steel claw size 1
dimension 45x30x5 mm
with 1 hole Ø 7 mm,
1 thread M6

2134501 **0.95 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Flat steel claw size 2
dimension 60x30x6 mm
with 1 hole Ø 10 mm,
1 thread M8

2134502 **1.00 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

2134522 **3.50 €/pc.**
stainless steel material 1.4301/304

Flat steel claw size 3
dimension 70x50x8 mm
with 1 hole Ø 12 mm,
1 thread M10

2134503 **1.80 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Flat steel claw size 3
dimension 70x40x6 mm
with 1 hole Ø 12 mm,
1 thread M10

2134523 **4.85 €/pc.**
stainless steel material 1.4301/304

Flat steel claw size 4
dimension 85x70x8 mm
with 1 hole Ø 15 mm,
2 threads M10

2134504 **3.80 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

2134524 **8.85 €/pc.**
stainless steel material 1.4301/304

Flat steel claw size 5
dimension 80x60x8 mm
with 2 holes Ø 12 mm and
hole distance 56 mm,
1 thread M10

2134509 **3.85 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Flat steel claws

Flat steel claw size 6

dimension 106x80x10 mm
with 2 holes Ø 14 mm and
hole distance 76 mm,
1 thread M12

2134511

7.85 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Flat steel claw size 7

dimension 124x80x10 mm
with 2 holes Ø 14 mm and
hole distance 104 mm,
1 thread M12

2134512

9.20 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Beam clamps

Beam clamps are available in different variations, which you can consult in the tabular listing. All beam clamps are hot-dip galvanised according to DIN EN ISO 1461 but can also be made of stainless steel.

Fixing brackets

Fixing bracket no. 901

mounting element for magnetic valves, transmitters and junction boxes, dimension 179x40x55 mm, thickness 4 mm with 4 slotted holes 6.6x26 mm and 1 slotted hole 11x22 mm

2199901 2.65 €/pc.

hot-dip galvanized according to DIN EN ISO 1461

2199901-1 8.70 €/pc.

stainless steel material 1.4301/304

Fixing bracket no. 902

mounting element for transducer, dimension 120x60x40 mm, thickness 6 mm, with 2 slotted holes 11x22 mm and 2 holes Ø 12 mm

2199902 5.80 €/pc.

hot-dip galvanized according to DIN EN ISO 1461

2199902-1 15.80 €/pc.

stainless steel material 1.4301/304

Fixing bracket no. 903, size 1

mounting element for universal use, dimension 80x25x55 mm, thickness 4 mm, with 1 slotted hole 6.6x26 mm and 1 slotted hole 11x26 mm

2199903 2.15 €/pc.

hot-dip galvanized according to DIN EN ISO 1461

Fixing bracket no. 904, size 2

mounting element for universal use, dimension 150x25x55 mm, thickness 4 mm, with 3 slotted holes 6.6x26 mm and 1 slotted hole 11x25 mm

2199904 2.90 €/pc.

hot-dip galvanized according to DIN EN ISO 1461

Fixing bracket no. 002, size 2

mounting element for steel channel 40x20 mm, dimension 60x22x60 mm, thickness 6 mm, with 2 slotted holes 11x22 mm

100002 2.60 €/pc.

hot-dip galvanized according to DIN EN ISO 1461

2199909 5.85 €/pc.

Steel channel

Mounting elements made of steel channel as a support and auxiliary construction are characterised by their high stability, so that even objects with heavy loads can be fastened.

Shim plates

Shim plates are excellent for levelling. They are stackable and can be used for levelling uneven floors or similar. In addition, the washers are resilient and pressure-resistant.

Railing holder

Railing holders are used for mounting transmitter boxes or control cabinets. The railing holders are available in different sizes so that e.g. transmitter boxes or control cabinets of different sizes can be mounted. The holders are designed for **handrail** made of tube Ø 42.4 mm (DN32, 1 ¼") and for **knee** or **foot rail** made of tube Ø 26.9 mm (DN20, ¾"). The distance between handrail and knee rail is 500 mm, or between handrail and foot rail 750 mm.

Railing holder

for transmitter protection boxes,
control cabinets etc.,
with 1 hole Ø 11 mm and
1 slotted hole 11x60 mm,
hole distance 340 mm,
flank height 535 mm

2199855 **100.50 €/pc.**

Light stands

The robust solution for easy and safe mounting of all kinds of luminaires.

Another product range are the light stands, which are manufactured in different, very stable designs of high quality.

The **schreier** light stands are suitable for mounting on pipe bridges, railings and masonry. A variety of mounting options are also available for mounting on stair railings.

Different geometries enable a wide variety of uses. The production portfolio includes small lamp brackets, rigid and rotatable, straight and curved light stand versions. In addition, there is the option of mounting a foldable version that allows the operator to safely replace the luminaire without a ladder.

The luminaires can be assembled in different positions as well as in longitudinal or transverse direction to the lamp stand. The necessary mounting material is also made by **schreier** and completes the range.

The flexibility of the mounting options is particularly advantageous, as different components can be used to vary the distance to the handrail as well as the position of the floor mounting. We would be pleased to advise you on this for your projects.

The ground connection of a light stand is required if it is not sufficiently connected to adjacent metallic structural parts by its mounting (discharge capability must be ensured).

Many light stands and mounting parts can be supplied in hot-dip galvanised and stainless steel versions. Special shapes can also be produced on customer request.

Light stands

Lamp bracket

Lamp bracket DN50

made of threaded pipe
DN50x920 mm, thread R 2",
protected by pipe protection,

The light stands can be mounted in different ways. Four examples are shown below, but there are other ways of mounting, which depend on the on-site conditions.

Version 1: Mounting on the stair railing and the stair stringer

Bill of material

Upper intermediate part, Z-steel	2199061	1 piece
Round steel bracket, form A, DN65	3570065	1 piece
Round steel bracket, form A, DN40	3570040	1 piece
Lower intermediate part, Z-steel	2199062	2 pieces
Support bracket	2199052	1 piece

Mounting material

Hexagon nut M10 EG	30267	2 pieces
Washer A10,5 EG	30018	2 pieces
Hexagon screw M12x40 EG	30003	8 pieces
Hexagon nut M12 EG	30011	10 pieces
Washer A13 EG	30281	10 pieces

Version 2: Mounting on the stair railing at the baseboard

Bill of material

Mounting plate	2199055	1 piece
Round steel bracket, form A, DN65	3570065	1 Stück
Round steel bracket, form A, DN40	3570040	2 pieces
Support bracket	2199052	1 piece
Beam clamp/	1345608	2 pieces
<i>alternative: Flat steel claw size 4</i>	2134504	2 pieces

Mounting material

Hexagon nut M10 EG	30267	4 pieces
Washer A10,5 EG	30018	4 pieces
Hexagon screw M12x50 mm EG	30722	2 pieces
Hexagon nut M12 EG	30011	4 pieces
Washer A13 EG	30281	4 pieces

Note: The scope of delivery does not include fastening parts such as screws, washers or nuts. However, these can be ordered as well.
EG = electrogalvanized

Light stand DN65

Note: Variants 2-4 can also be purchased for mounting the DN32 light stand with the associated material.

Version 3: Mounting on the railing DN40 and on the floor

Bill of material

Mounting plate	2199055	1 piece
Round steel bracket, form A, DN65	3570065	1 piece
Round steel bracket, form A, DN40	3570040	2 pieces
Foot for light stand made of flat steel	2199051	1 piece

Mounting material

Hexagon nut M10 EG	30267	4 pieces
Washer A10,5 EG	30018	4 pieces
Hexagon nut M12 EG	30011	2 pieces
Washer A13 EG	30281	4 pieces
Hexagon screw M12x40 EG	30003	2 pieces

Version 4: Mounting on the railing DN40 and besides the floor/stage

Bill of material

Mounting plate	2199055	1 piece
Round steel bracket, form A, DN65	3570065	1 piece
Round steel bracket, form A, DN40	3570040	2 pieces
Support bracket	2199052	1 piece

Mounting material

Hexagon nut M10 EG	30267	4 pieces
Washer A10,5 EG	30018	4 pieces
Hexagon nut M12 EG	30011	2 pieces
Washer A13 EG	30281	6 pieces
Hexagon screw M12x40 EG	30003	4 pieces

Note: The scope of delivery does not include fastening parts such as screws, washers or nuts. However, these can be ordered as well.
EG = electrogalvanized

Mounting material

Reducing sleeve
2" x 1 1/4",
malleable cast iron

1270139 **22.30 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

T-piece
2" x 1 1/4" x 1 1/4",
malleable cast iron

1273125 **20.80 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

Mounting plate
for light stand to be mounted
on the railing, 120x120x6 mm

2199055 **13.85 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

Hexagon pipe nut R 2"
DIN 2950 for countering
the T-piece

1275308 **12.40 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

Upper intermediate part
for mounting on the railing,
made of Z-steel 80x120 mm

2199061 **16.15 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

Lower intermediate part
for mounting on the
stair stringer,
made of Z-steel 80x140 mm

2199062 **18.00 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

Mounting element
for mounting the luminaire on
the threaded pipe, made of steel
channel 50x76 mm

2199085 **6.00 €/pc.**

hot-dip galvanized according to
DIN EN ISO 1461

Mounting material

**Support bracket for
light stand DN65**

made of angled steel
140x140x15 mm and seamless
tube 70x8 mm, tube is
suitable for pulling in cables

2199052

80.80 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

**Support bracket for
light stand DN32**

made of angle steel
120x80x10 mm and seamless
tube 33.7x5 mm, tube is
suitable for pulling in cables

2199053

43.75 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

**Support bracket for
light stand DN32**

made of angle steel
120x120x10 mm and seamless
tube 33.7x5 mm, tube is
suitable for pulling in cables

2199071

49.90 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Foot for light stand DN65

made of flat steel 80x12x220 mm
and seamless tube 70x8 mm,
tube is suitable for
pulling in cables

2199051

58.00 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Foot for light stand DN32

made of flat steel 60x15x140 mm
and seamless tube 33,7x3,2 mm,
tube is suitable for
pulling in cables

2199048

on request

hot-dip galvanized according to
DIN EN ISO 1461

Holding bracket

for luminaire base or light stand on
railing according to WN 72-28,
made of unequal angle steel
150x100x10 mm

2199056

51.55 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Mounting material

Spacer for light stand
for railing DN32, in U-shape
40x60x140 mm

2199086 **7.60 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Underlay for light stand
dimension 30x10x66 mm,
for mounting on tubular railings
with round steel bracket,
made of flat steel

2199059 **3.60 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Mounting plate for light stand
made of flat steel, 120x30x8 mm,
hole distance 94 mm

2199060 **3.10 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Mounting part
universal piece for attaching
junction boxes to the baseboard
of grating platforms,
made of strip steel 30x4 mm

2199120 **9.95 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Mounting part, size 1
for protective pipe installation on
sectional beams, length 245 mm,
made of flat steel 30x5 mm,
to be bent at the grain

2199550 **4.20 €/pc.**
hot-dip galvanized according to
DIN EN ISO 1461

Mounting part, size 6
for protective pipe installation on
sectional beams, length 385 mm,
made of flat steel 30x5 mm,
to be bent at the grain

2199555 **on request**
hot-dip galvanized according to
DIN EN ISO 1461

Mounting material

Spacer 950

mounting element
for pipes Ø 12 mm,
length 50 mm,

made of strip steel 25 x 4 mm

2199950

0.70 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Spacer 951

mounting element
for pipes Ø 12 mm,
length 85 mm,

made of strip steel 25 x 4 mm

2199951

1.05 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Spacer 952

mounting element
for pipes Ø 12 mm,
length 110 mm,

made of strip steel 25 x 4 mm

2199952

1.45 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Spacer 953

mounting element
for pipes Ø 12 mm,
length 175 mm,

made of strip steel 25 x 4 mm

2199953

2.05 €/pc.

hot-dip galvanized according to
DIN EN ISO 1461

Fastening clamps

article number	DN	h	Ø d1	Ø d2	s	L1	L2	z	price/piece
1290413	32	39	43	12	5	106	80	30	1.70 €

1290417	50	57	61	14	5	136	106	40	3.15 €

dimension in millimeter

Pipe clamps are hot-dip galvanised according to DIN EN ISO 1461

Fastening clamp
for components on
square tube 40x40 mm,
width 30 mm

Connecting clamp DN65
Length 145 mm,
for outer pipe diameter 76.1 mm,
made of steel sheet 2.5 mm thick,
with 2 hexagon screws M8x25,
2 hexagon nuts M8,
2 galvanised spring washers

Connecting clamp DN32
Length 105 mm, for outer pipe
diameter 42 mm,
made of steel sheet 2.5 mm thick,
with 2 hexagon screws M8x25,
2 hexagon nuts M8,
2 spring washers Ø 8.1 mm

2199064 5.90 €/pc.

hot-dip galvanised according to
DIN EN ISO 1461

2199064-1 9,35 €/pc.

stainless steel material 1.4301/304

2152937 on request

electrogalvanised according to
DIN EN ISO 4042

2152938 on request

electrogalvanised according to
DIN EN ISO 4042

Round steel bracket
